About Us

Cosmic Flavours is a fresh, fun and creative flavour house based in the Midlands, U.K. Inspired by nature and driven by quality, Cosmic is proud to manufacture flavours for multiple applications including Food, Beverage, Nutrition, Fishing Bait and E-Cigarettes.

A wealth of experience and knowledge in ingredients and flavour formulating has translated into high-quality flavours which our customers love. We work closely with our clients and their product development teams adding value to their products.

Cosmic's chosen manufacturing partners are ISO9001, BRC AA, and FEMAS accredited, ensuring only the best manufacturing and traceability processes are in place.

Our passion for flavours and providing industry-leading customer service makes us your perfect partner. From initial enquiry to product delivery, we offer an "Out Of This World Experience".

Tried and Tested

Our range of e-cigarette flavourings have been tried and tested, full of flavour and soluble in VG/PG. We have helped develop several e-liquid ranges launch in to a highly competitive and saturated market, but standing out as a result of our quality flavourings.

Cosmic works closely with clients, ensuring products are formulated and manufactured correctly inline with TPD regulations and our experienced flavourist and purchasing team, ensure our vaping flavour concentrates use only the best ingredients available.

Not only are we transparent with information, we are proud to work efficiently ensuring speed of delivery.

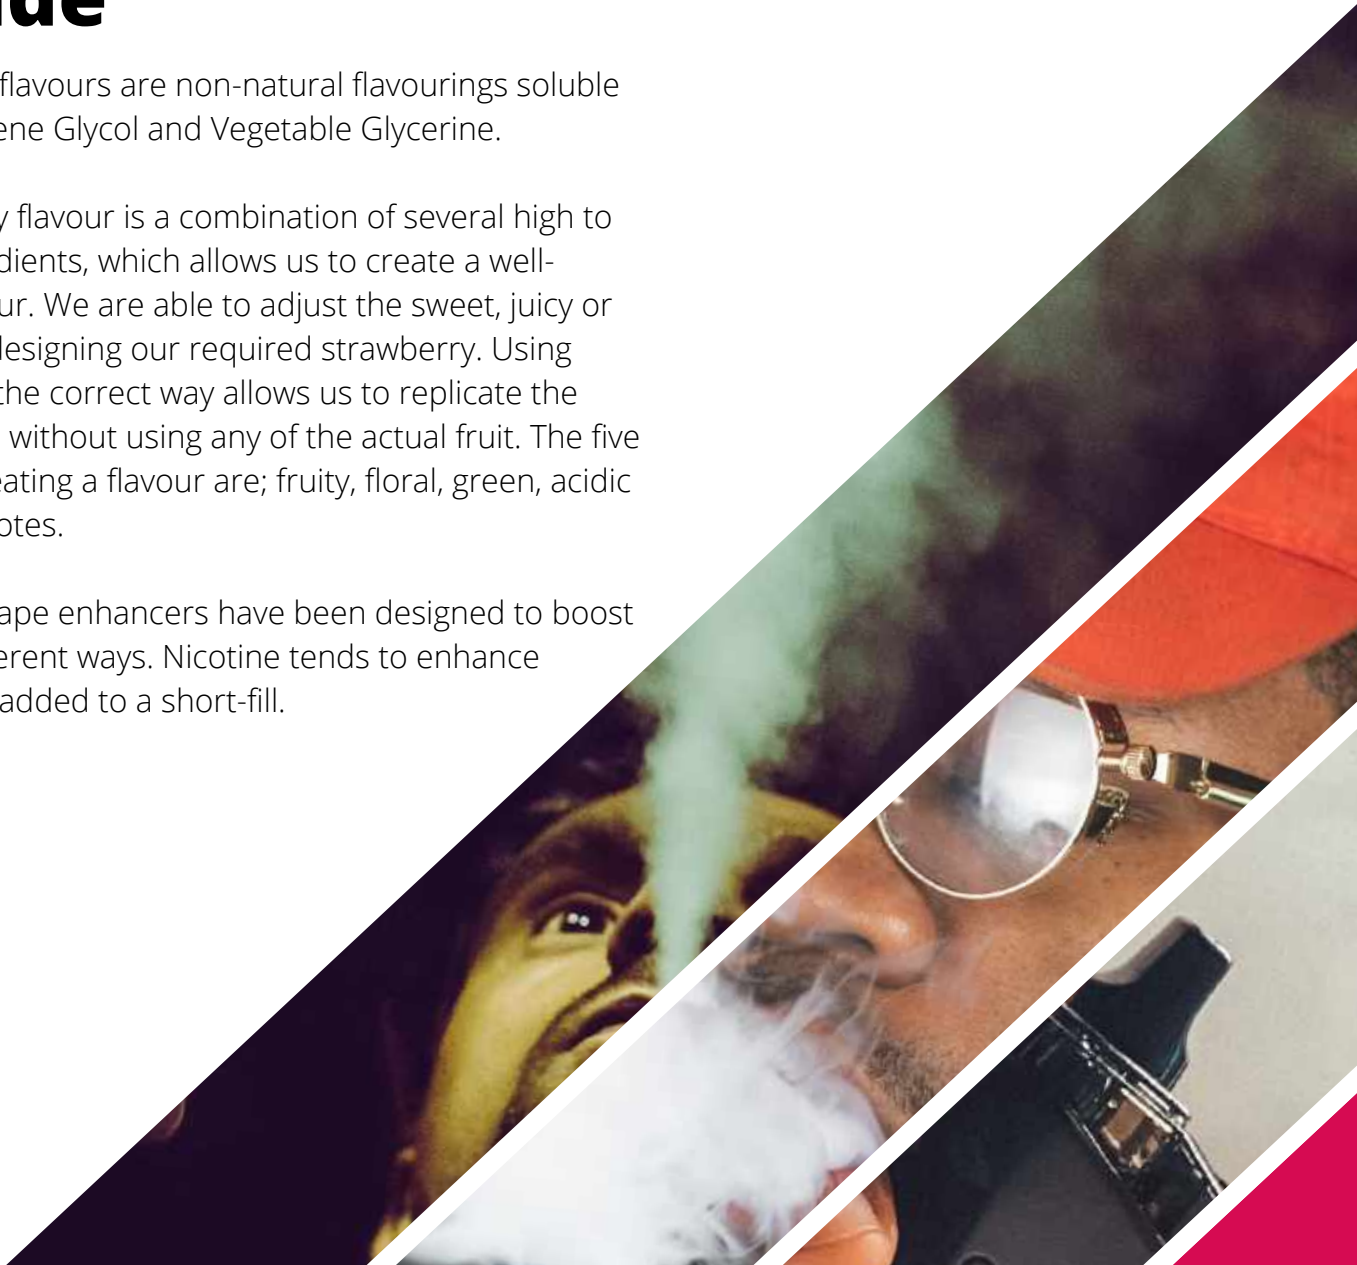

How A Flavour is Made

Cosmic's vape flavours are non-natural flavourings soluble in both Propylene Glycol and Vegetable Glycerine.

Our strawberry flavour is a combination of several high to low note ingredients, which allows us to create a well-balanced flavour. We are able to adjust the sweet, juicy or sour levels in designing our required strawberry. Using ingredients in the correct way allows us to replicate the taste of nature without using any of the actual fruit. The five divisions of creating a flavour are; fruity, floral, green, acidic and caramel notes.

Our range of vape enhancers have been designed to boost flavours in different ways. Nicotine tends to enhance flavours when added to a short-fill.
